- 120kg (300 lbs) static loading
- Reinforced composite material
- Thermo-bonded elastomeric seat pads
- Stainless steel reinforced axles
- 2.4m (7.5') strap with cam-lock buckle
- Adjustable kick-stand

The Ultimate Kayak & Canoe Trolley

Original - Unrivalled - Envied

The New Zealand made C-TUG Kayak and Canoe trolley is setting new standards with its sophisticated style and precision design. C-TUG is the best, most versatile and durable kayak trolley on the market. It carries up to 120kg (300lbs), dismantles for easy stowing, won't rust.

The only "engineered" cart on the market!

C-TUG trolleys are now supplied with the New Zealand made Puncture Free Wheels, with hi-grip rubber tread, in place of the old-style pneumatic wheels, no more flat tires - hassle free usage.

If you have an old C-Tug with pneumatic wheels and want to upgrade, all you do is clip off your old wheels, and clip on the new ones, easy as!! Please contact us to buy your new, puncture-free wheels.

Also available are the optional Sidewinders add on for soft sand. The clip and go Sidewinders will give users a wider footprint without having to worry about the high cost or punctures associated with low pressure balloon tires.

Sidewinder Attachment

When the going gets soft, the Sidewinder comes out! Just like the small snake it's named after, the Sidewinder is right at home on soft sand.

See the Sidewinder demonstration video [HERE](#)

Designed to double the footprint of your c-tug puncture-free wheel, the sidewinder attachment gives greater weight distribution, reducing the chance of the trolley becoming "bogged down" in really soft sand or mud.

The robust design of the Sidewinder means once it is fitted, it can't be removed. An extra set of spare wheels can be purchased if you need to use the trolley without the Sidewinders.

Parts & Accessories

C-TUG comes with a 5 year guarantee against defects. If a manufacturer's defect is found, parts are replaced free of charge. For lost or damaged C-TUG components, parts can be purchased.

Parts & Accessories

C-TUG comes with a guarantee against manufacturer's defects. If a defect is found, parts are replaced free of charge. C-TUG will send you a new part for the cost of shipping (see Warranty & Care section for details). For lost or damaged C-TUG components, parts can be purchased.

CT-1002	Cross Beam - single
CT-1003	Kick Stand
CT-1004	Hull Pad - single
CT-1018	Strap Kit (Clips & Webbing)

Warranty & Care

The C-TUG is designed for the movement of watercraft. It is not designed for the movement of people either directly on the trolley or in or on watercraft or other objects placed on the trolley.

The C-TUG is designed to be pulled manually. Do not tow behind a vehicle or bicycle - this will void the warranty.

Due to the marine environments where this product may be used, we suggest the following steps to help extend the life of your C-TUG:

Caring for your C-TUG

1. After using your C-TUG in salt water, sandy areas and dusty conditions, remove the wheels, disassemble the chassis and hose down with fresh water. Wash the axle area thoroughly.
2. Do not clean with solvents or solvent based products and avoid commercial cleaning products. Fresh clean water is suitable for cleaning all C-TUG components.
3. Do not leave your C-TUG trolley in strong sunlight for extended periods. Your C-TUG is designed for use outdoors but both rubber and thermoplastics will degrade if left in strong sunlight for extended periods.
4. If your C-Tug is fitted with pneumatic tires, do not over inflate them. The recommended maximum inflation pressure is 25 PSI cold. Replace the valve stem caps after inflation

Your C-TUG trolley is a robust product designed to take the hard work out of getting your watercraft to and from the water. With reasonable care you can expect your C-TUG to serve you well for many years. C-TUG encourages users of C-TUG products to observe safe practice procedures when using products in marine environments.

C-TUG Warranty Statement:

You will find the investment made when you purchase your C-TUG goes well beyond the trolley itself. We back up the design and workmanship of the experienced manufacturers with a guarantee for each C-TUG. In the event damage occurs or a problem is found just contact us and we will quickly evaluate & find a solution. Please understand that not all damage is a warranty issue, & we cannot take responsibility for a usage error.

Guaranteed for 5 years against manufacturer's defects - If a manufacturer's defect is found, parts are replaced free of charge, you only pay for the freight. Please contact your C-Tug retailer or distributor.

If you have any queries about our commitment to after sales service, please [contact us](#) anytime.
