APOLLO XI Fixed Length/Angle

Price: \$390.00

Carbon Fibre Paddles that are really light and very efficient and smooth through the water.

Round shaft of composite material and available in fixed length of 210cm 30 degree offset or adjustable 210 to 220 cm and adjustable offset.

This is a great paddle which offers best return on effort, making it ideal for short quick workouts and racing marathon competitions.

Sizes:

- 195 cm to suit a paddler 5'0" thru 5'4"
- 200 cm to suit a paddler 5'5" thru 5'6"
- 205 cm to suit a paddler 5'7" thru 5'10"
- 210 cm to suit a paddler 5'11" thru 6'1"
- 215 cm to suit a paddler 6'2" and over

The APOLLO XI blade is 500 mm in length, 160 mm at it widest point and the scoop is 30 mm deep at the deepest point in the blade.

The paddle weighs just 650 grams. And all fixed blade paddles have a 60 degree off set

APOLLO XI Adjustable Angle/Length

Price: \$445.00

Carbon Fibre Paddles that are really light and very efficient and smooth through the water.

Adjustable 206-216cms with oval shaft.

Paddle Cover \$25 GST inc.

Soft Cloth paddle cover with carry handle and buckle tie in rope. Great to protect your paddle and keep it dry as you store it away.

THINK POWER WING

Price: \$450.00

The PowerWing has gone through extensive prototyping and testing, with the end result offering a true performance breakthrough. It's the perfect marriage of a high performance blade AND a revolutionary shaft.

The PowerWing blade provides a smooth but solid catch.

They are stable all the way through the stroke, and clean on the exit.

The medium/small blade size is perfect for ski racing or fitness paddling. The blades are then mated to our unique small diameter shaft (25.4 mm), and then finished with the PowerGrip grip tape.

The PowerGrip itself offers the right amount of grip vs.slip, and requires significantly less effort to control the paddle. The end result is less fatigue in your fingers and forearms, offering a real world advantage.

By beginning with the smaller diameter shaft, it allows us to add the PowerGrip, while keeping the overall diameter ideal for comfort and performance. The shaft is a two-piece adjustable, 206 - 216 cm.

Our locking mechanism is a simple stainless clamp that does not slip, creep, seize, or bind. Sometimes simple is best.

The result is a two-piece paddle you can trust to perform long term.

STELLAR CARBON WING

Price: \$450 - \$650

The Mid-Size Wing Paddle provides strong connection through the drive and a clean release.

The Airfoil cross-section of our wing provides hydrodynamic lift during a high angle stroke.

Comfortable Oval Shaft fits your hand well and is stiff for maximum power application.
Specifications:

Blade Length 20 in (51.5 cm) Blade Width 6.5 in (16.5 cm) Blade Area 117 in² (755 cm²)

The Small-Size Wing Paddle provides strong connection through the drive and a clean release.

The Airfoil cross-section of our wing provides hydrodynamic lift during a high angle stroke.

Comfortable Oval Shaft fits your hand well and is stiff for maximum power application.
Specifications:

Blade Length 19.6 in (50 cm) Blade Width 6.3 in (16 cm) Blade Area 113 in² (730 cm²)

Features:

Airfoil Cross-section
Easy Adjusting Cam-Collar
Ovalized Shaft Stiff cored blades
Adjustable Cam-Collar
Length and Angle adjustable
Light Weight

Grade	Ultralight	Hybrid Value	Value
Weight	27 oz / 780g	30oz / 860g	330z / 950g

Construction Descriptions:

Carbon Wing

Ultra stiff cored Carbon blade and smooth finished oval woven carbon shaft.
Epoxy construction in heated press molds creates a durable finished on the blade.

Blue Wing

Stiff cored colored fiberglass blade available in Blue or Red and smooth finished oval carbon shaft.

Epoxy construction in heated press molds creates a durable finished on the blade.

Red Wing

Durable dyed colored fiberglass blade available in Blue or Red with a black oval fiberglass shaft.

Epoxy construction in heated press molds creates a durable finished on the blade.

Brača I Extra Light 6-man

Brača I, IV and FW are the original world's first 'tear-drop' design and our most widely used paddle. The paddles are designed to facilitate application of the power in the beginning (catch) and in the middle of the stroke, enabling the ultimate forward stroke capabilities.

Brača I and Brača IV are available with Marathon blade construction. This is a result of advanced technology, a proprietary blend of composite materials and was designed with the marathon and adventure paddler in mind. The edge of the blade is reinforced with a kevlar layer that makes it highly impact resistant in extreme down river conditions.

Brača I and Brača IV are now available in the new Extra Light and stiff construction for the athletes who prefer light and stiff characteristics.

Brača IV 60 is designed for the paddlers who prefer softer blade and shaft.

Brača Children is an exact copy of the Brača I and Brača IV with proportionally smaller blade size and with proprietary material characteristics and mechanics of the paddle that are specifically designed to fit children's psychology, enabling absorption of impact from each paddle stroke reducing shock on the shoulders, elbows and wrists and ultimately reducing common kayak injuries.
